EDUCATION

Bachelor of Arts in Cybersecurity & Information Assurance (CIA)

December '26

Minor in Computer Science

Frostburg State University | Frostburg, MD

- Minor in Computer Science
- Relevant Coursework: Network Security, Operating System Security, Computer & Network Forensics, Hacking Exposed & Incident Response, Software Security Engineering

PROJECTS

Kali → Windows Attack Simulation & Sysmon Detection

April '26

- Built an isolated VMware lab simulating a full cyber kill chain attack from a Kali Linux attacker to a Windows 11 victim using Metasploit and msfvenom, demonstrating vulnerability exploitation, payload delivery over TCP/IP, and post-exploitation techniques via meterpreter session.
- Deployed Microsoft Sysmon with SwiftOnSecurity configuration to capture 985 endpoint telemetry events; performed log analysis and threat hunting to map Indicators of Compromise (IOCs) to MITRE ATT&CK techniques (T1204, T1059, T1562, T1571, T1105) and author SIEM detection rules in a SOC-style incident response report.

WORK EXPERIENCE

Development Associate Intern

June' 25 - August '25

Young Mothers Inc. | Washington D.C.

- Leverage excel for data analysis, manage donor data, track fundraising progress, and organize campaign-related information.
